EXPERIENCE

Junior Software Engineer

Settlin - Linking Spaces Technologies Pvt. Ltd.

📅 August 2022 – Present

📍 Bangalore, India

- Participated actively in the development stage, assisting in the provision of innovative features for a variety of projects. This participation required both technological knowledge and creativity.
- Led the team, assisting them in better understanding requirements, and ensured the timely completion of tasks while maintaining code quality through rigorous code reviews.
- Took on the responsibility of assigning cards, overseeing their timely completion, and ensuring their prompt release as part of the overall project management efforts.

PERSONAL PROJECT

✂ URL Shortner

Developed a unique URL shortening application for link management, employing ReactJS for the front end and NodeJS with Express for the back end. Hosted the system on a personal Linux server, using Nginx for efficient server management.

📁 Portfolio

Created a personal portfolio website to showcase my skills, projects, and professional experience. ReactJS was used for the frontend, and an Express server with NodeJS was used to manage email services via MailJet.

₿ Crypto Price Tracker

Built a cryptocurrency price tracking tool using ReactJS. CoinGecko APIs were integrated to dynamically fetch cryptocurrency prices, and ChartJS was used to visually represent price trends on interactive charts.

🎮 29 Card Game

My favorite personal project is the development of a 29-card game that allows users to play with the system. This game provides users with a variety of theme options and was created entirely in ReactJS with Material-UI 5. JavaScript was used to thoughtfully implement all of the underlying logic and functionality.

ABOUT ME

Experienced full-stack developer with 1.5 years of ReactJS, NodeJS, and MongoDB experience. Recognized for a smooth transition into a leadership role after only six months at my first company. I have the efficiency of a seasoned 3-year-old developer, combining technical knowledge with a quick and creative approach to problem-solving. I am eager to contribute technical expertise and leadership to dynamic projects and teams.

TECHNICAL SKILLS

🔗 Programming Language

- JavaScript

🔧 Web Tools/Framework

- HTML
- CSS
- Express
- ReactJS
- MeteorJS
- NodeJS

git Version Control System

- Git

🗄 Database

- MongoDB

🖥 Oprating System

- Linux
- Windows

📋 Task Management
